ance Notes on Codes and Abbreviations" appearing at the begin-  
ning of each regular issue of the PCT Gazette.*

(54) Title: METHOD AND COMPOSITIONS FOR TRANSFORMATION AND REGENERATION OF MAIZE

(57) Abstract: Methods for transforming plants, particularly commercially important elite maize inbreds, are provided. The meth-  
ods involve transformation of meristematic organogenic tissue or immature embryos, and include the use of defined plant growth  
media. The methods disclosed provide more stable transgenic plants, and permit the transformation of varieties of cereals that are  
not amenable to transformation by conventional approaches.

WO 2004/022707 A3

## INTERNATIONAL SEARCH REPORT

International application No.

PCT/US03/27565

**A. CLASSIFICATION OF SUBJECT MATTER**

IPC(7) : C12N 15/11, 82, 87; C12N 5/14; A01H 5/00, 4/00.

US CL : 435/412, 419, 424, 430, 431; 536/23.1; 800/278, 298, 320.1

According to International Patent Classification (IPC) or to both national classification and IPC

**B. FIELDS SEARCHED**

Minimum documentation searched (classification system followed by classification symbols)

U.S. : 435/412, 419, 424, 430, 431; 536/23.1; 800/278, 298, 320.01

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched  
West, STN

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

**C. DOCUMENTS CONSIDERED TO BE RELEVANT**

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
Y	ZHANG, et. al. Transformation of recalcitrant maize elite inbreds using in vitro shoot meristematic cultures induced from germinated seedlings. Plant Cell Reports. 2002, Vol. 21, pages 263-270, see entire document.	1-21
Y	ZHANG, et. al. Genetic transformation of commercial cultivars of oat ( <i>Avena sativa</i> L.) and barley ( <i>Hordeum vulgare</i> L.) using in vitro shoot meristematic cultures derived from germinated seedlings. Plant Cell Reports. 1999, Vol. 18, pages 959-966, see entire document.	1-21

Y	DONCHEVA, et. al. Effect of copper excess on the morphology of the nucleus in maize root meristem cells. Physiologia Plantarum, 1996, Vol. 96, No. 1, pages 118-122, see entire document.	1-21
Y	US 6,235,529 B1 (LEMAUX, et. al.) 22 May 2001 (22.05.2001), entire document.	1-21

Further documents are listed in the continuation of Box C.

See patent family annex.

## \* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T"

later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X"

document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y"

document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&amp;"

document member of the same patent family

Date of the actual completion of the international search
